The improved method by which it has been made possible to produce pure cream of tartar has had an important bearing upon the manufacture of baking-powder.

By the process heretofore generally employed, it has been found impossible to re-

the tartrate of lime, which remained to such an extent as to greatly impair the quality of the cream of tartar, and to interfere seriously with the strength and wholesomeness of the baking-powders into which it entered.

which it entered.

In the new process, which is owned by
the Royal Baking-Powder Company, of
New York, and exclusively employed in its
extensive tartar works, the imported crude
grape acid is so treated as to remove all vestige of tartrate of lime or other impurities,
giving a product before unknown—a chem-

giving a product before unknown—a chemically pure cream of tartar.

By the employment of these superior facilities the Royal Baking-Powder Conpany has made the Royal Baking-Powder, as the chemists all certify, of the highest possible degree of strength, "absolutely pure" and wholesome, and with analways uniform leavening power. It is for these reasons that the "Royal" never fails to produce bread, biscuit, cakes, etc., that are light, sweet, digestible, and wholesome; the eating of which is never followed by Indigestion, or any of those physical discomforts attendant upon the partaking of improperly prepared food. In rendering possible the production of a baking-powder possessed of these qualifications, the improved method of refining cream of tartar becomes at once a matter of material tar becomes at once a matter of materia importance to the culinary world.
